

Remote Control Software Development Kit (SDK)

Compatible with NEXIV Video Measuring Systems
for Automatic Measurement System Integration

Easily create software routines for NEXIV control.
Simplifies the process of building an effective automatic measurement system,
for an automated production floor, along with manpower savings.

The remote control Software Development Kit (SDK) is a tool for developing user software modules to control and automate the NEXIV video measuring systems. Automate component carriers and measurement steps remotely or on the production floor by integrating NEXIV together with the component carrier conveyor system.

Save manpower
and automate the
production floor

– Control multiple NEXIV systems remotely.

Manage
measurement
programs and results
all in one place

– Transfer measurement programs to the NEXIV and collect measurement data results via secure network.

– Reduce errors by eliminating the need to go and collect measurement results from, or copy measurement programs to and from every NEXIV PC location.

Easily create control
software routines
to optimize factory
operations

– A suite of tools makes it straight forward to build the routines.
